

What Do You Think?

We are examining the merits of Epay Manager, a web-based electronic payment system designed for the transportation industry.

Overview

An electronic system will allow our company to move away from a paper-based, traditional payment system and replace it with electronic invoices, online proof of delivery documents and make payments using the ACH network, instead of paper checks.

The implementation of this system will allow our company to:

- Reduce the processing time of all transactions by a minimum of 6 to 10 days, the average time invoices and checks spend in the US mail.
- Reduce accounts payable and receivable processing costs. Most national studies estimate these savings to be more than \$20.00 per invoice generated, processed, paid or collected.
- Provide for and use expanded payment options on all invoices submitted.

Please take a moment to complete this brief survey. Your responses will be helpful in determining whether we replace our traditional payment system with Epay Manager.
