From: Christy

I want to compliment your company for creating a payment system that truly addresses the needs of companies like ours. Most of the customers we haul for require lots of paperwork and specialized invoices, which can be difficult to manage. We love to be paid with Epay because we can fax in our paperwork and the invoice is automatically created for us. With Epay, we know exactly when we are going to be paid and there is no fear of being told the check is in the mail or that it is lost. Also, not having to drive that check to the bank is a real time saver.

Regards,  
*Christy*
