

Manis Logistics Selects Epay Manager

MARYLAND HEIGHTS, MO – October 30, 2007

Level One Technologies is pleased to announce the addition of Manis Logistics to the Epay Manager freight distribution and electronic payment network. Manis Holdings LLC is launching a new logistics company in November 2007 and has selected Epay as its software to electronically share information with its carriers.

Epay Manager will be used in conjunction with Manis' web based freight management software, Load Pilot, to communicate available load information and electronically exchange invoices and proof of delivery documents with its carriers.

"Our staff is located throughout the country. When deciding on software, our company felt it was important to find a web based solution. This feature will allow our dispatchers, accountants and executives to be instantly networked," said Matt Spafford, Vice President of Manis Logistics.

Epay Manager will allow participating carriers to register for Manis' private network, to receive an interactive list of available freight and be given the first opportunity to submit a bid. With this capability, Manis will be able to tender loads to its entire carrier base from its agents' offices in the most efficient way possible.

Manis' accounts payable employees will be able to work simultaneously from any location using Epay's electronic payable system. Electronic invoices will be automatically created using data from the Load Pilot software and emailed to the carrier's billing department after the load has been delivered. The electronic invoice will include a custom fax coversheet for carriers to submit delivery documents. Carriers will also be given the opportunity to select alternate payment terms and request changes before submitting the invoice. To complete the transaction, Epay will initiate an ACH payment and electronically deposit funds into the carrier's bank account.

"Managing hundreds of loads a week from multiple office locations is a cumbersome process typically marked with delays and errors. With Load Pilot and Epay Manager, our company will be able to place staff across the country and

have easy access to lists of freight, invoices, delivery documents and payment history. Epay Manager will allow us to customize our invoice approval process and include employees from multiple locations without delay. Processing loads and invoices electronically will allow Manis to stay organized and provide exceptional service to our carriers and customers" said Matt Spafford.

About Manis Logistics

Manis Logistics is based in Plant City, FL and provides third party logistics services to the produce industry. Additional information may be obtained at www.manismarketing.com or via telephone at 563-519-2189.
