

CARRIER BENEFITS

Epay Manager Powered by OTR Solutions provides the most effective way to invoice and receive payment

Epay Manager is a complete electronic payment system built for the transportation industry, designed to significantly improve a carrier's cash flow by streamlining invoice processing and accelerating payment.

Simplify and Streamline Processes

- Eliminate manual processes to create and send invoices
- Eliminate reliance on managing an email inbox for invoicing
- Upload PODs directly to Epay
- Receive and manage electronic invoices
- No software or mobile app to purchase, update, or maintain

Improve Cash Flow

- Multiple payment term options for each invoice
- A risk free, low cost alternative to factoring
- Receive payment via ACH with real-time email notifications
- Obtain the benefits of EDI invoicing without the cost

Gain Visibility & Build Stronger Relationships

- View audit trails and details for every invoice transaction
- Receive email notifications when invoices are approved and paid
- Improve broker relationships through better communication and faster dispute resolution

Many carriers focus on operational issues, but overlook a critical factor: cash flow. Processing invoices and receiving payments in a timely manner is a universal challenge. Managing this problem effectively is one of the keys to success in the transportation industry.

Epay helps carriers improve cash flow by eliminating the need to exchange documents through email. Carriers are no longer required to create or submit invoices. These invoices are replaced with electronic versions that are created automatically after delivery, in the Epay Manager portal. Proof of Delivery documents are also uploaded or emailed to Epay Manager. And finally, all payments are handled within the Epay Manager portal with a direct deposit to your bank, for free!

RECEIVE PAYMENT WITH NO DELAYS

Once a transaction is invoiced and approved, Epay initiates an ACH request that transfers the invoice amount from the broker's bank account to the carrier's. Payments are completed the same day as released from the broker, without unnecessary delays. With Epay, the billing process is reduced to just a few clicks.

TAKE ADVANTAGE OF FLEXIBLE QUICKPAY OFFERINGS

Every carrier faces occasional cash flow crunches. Epay offers a built-in solution: flexible payment options that let carriers choose faster payments, at a discount, with the click of a button.

For each invoice, brokers provide a grid of pre-approved payment terms. Carriers can select the option that best fits their cash flow needs at the time of submission. Epay ensures brokers meet the exact terms selected with no exceptions. When faster payment isn't needed, carriers can opt for standard, non-discounted terms.

IMPROVE RELATIONSHIPS WITH BETTER COMMUNICATION

Epay benefits both brokers and carriers by enhancing communication while reducing processing time and administrative overhead.

Carriers benefit from faster guaranteed payment options via direct deposit, real-time visibility into every step of the payment process, full detailed audit logs and notes on their invoices with date and time tracking, automated status updates, and extensive historical payment reporting.

With Epay, carriers spend less time chasing unpaid invoices and more time focusing on their business.
